ional Application No 🧦 PCT/CA 03/01555

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 C07K14/47 C12Q1/68

C12N15/11

G01N33/50

According to International Patent Classification (IPC) or to both national classification and IPC

### B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols) CO7K C12Q C12N IPC 7

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, EMBASE, BIOSIS, MEDLINE, EMBL

SRISAWAT CHATCHAWAN ET AL: "RNA affinity tags for purification of RNAs and ribonucleoprotein complexes."  METHODS (SAN DIEGO, CALIF.) UNITED STATES FEB 2002, vol. 26, no. 2, February 2002 (2002–02), pages 156–161, XP002278259 ISSN: 1046–2023 the whole document  Y Patent family members are listed in annax.  **To later document published after the International filing date of the earlier document published on or after the International filing date of the stablish the publication date of another which is cried to establish the publication date of another which is cried to establish the publication date of another which is cried to establish the publication date of another which is cried to establish the publication date of another which is cried to establish the publication date of another conterments of the stablesh the publication date of another conterments of the stablesh the publication date of another conterments of the stablesh the publication date of another conterments of the stablesh the publication date of another conterments is later than the priority date claimed  Date of the actual completion of the International search  29 April 2004  Date of the actual completion of the International search  26/05/2004	alaganie	Citation of document with indication, where convenients of the	ho relevant necessor	Delevent to elsis No
tags for purification of RNAs and ribonucleoprotein complexes."  METHODS (SAN DIEGO, CALIF.) Y later document published after the international filing date the document which may throw doubts on priority dating(s) or which is cited to establish the publication date of another citation or other speads reason (as specified) O' document referring to an oral disclosure, use, exhibition or other means P document published prior to the International filing date but later than the priority date claimed  Date of the actual completion of the international filing date but later than the priority date claimed  Date of mailing of the international search report  Date of mailing of the international search report	alegory	Channot of document, with indication, where appropriate, or to	ne reievani passages	Relevant to claim No.
Tissn: 1046–2023 the whole document  X Further documents are listed in the continuation of box C.  X Patent family members are listed in annex.  Y Patent family members are listed in annex.  Y later document published after the international filing date but later than the priority date claimed  Y document of lead to establish the publication date of another citation or other special reason (as specified)  Y document referring to an oral disclosure, use, exhibition or other means  Y document published prior to the international filing date but later than the priority date claimed  Y document ophicalized relevance; the claimed invention cannot be considered novel or cannot be considered involve an inventive slep when the document is taker or other means  Y document ophicalized relevance; the claimed invention cannot be considered to involve an inventive slep when the document is taker or other means.  Y document ophicalized relevance; the claimed invention cannot be considered invention cannot be considered invention cannot be considered invention and be considered to involve an inventive slep when the document is staken by document referring to an oral disclosure, use, exhibition or other means.  Y document ophical with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of ments, such combined with one or more other such of m		tags for purification of RNAs ribonucleoprotein complexes." METHODS (SAN DIEGO, CALIF.) UN FEB 2002, vol. 26, no. 2, February 2002	1-3,5, 9-12, 14-17, 20-22	
The whole document  The whole document which may throw doubts on priority date and not in conflict with the application cited to understand the publication date of another diction or other special reason (as specified)  The document referring to an oral disclosure, use, exhibition or other means  The document referring to an oral disclosure, use, exhibition or other means  The document referring to an oral disclosure, use, exhibition or other means  The document published prior to the international filing date but later than the priority date claimed  The whole document published and the whole with the priority date claimed invention or other means  The document published and or a disclosure, use, exhibition or other means  The document published and or a disclosure, use, exhibition or other means  The document published and or a disclosure, use, exhibition or other means  The document published and or another claimed invention invention  The document published and the international filing date but later than the priority date claimed  The whole and invention or priority date claimed invention or other such or ments, such combination being obvious to a person s in the art.  The document published after the International filing date but are document to particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such of ments, such combination being obvious to a person s in the art.  The document published after the International filing date but are document published and to in conflict with the application or priority date and not in conflict with the application or priority date and not in conflict with the application or priority date and not in conflict with the application or priority date and not in conflict with the application or priority date and not in conflict				
Further documents are listed in the continuation of box C.  Yearn family members are listed in annex.  The document defining the general state of the art which is not considered to be of particular relevance invention in the principle or theory underlying invention or clied to understand the principle or theory underlying invention is cited to establish the publication date of another citation or other special reason (as specified).  The document referring to an oral disclosure, use, exhibition or other means.  The document published prior to the international filling date but later than the priority date claimed.  The document published prior to the international filling date but later than the priority date claimed.  The document published prior to the international filling date but later than the priority date claimed.  The document published prior to the international filling date but later than the priority date claimed.  The document published after the international filling of priority date and not in conflict with the application of particular relevance; the claimed invention cannot be considered novel or cannot be considered involve an inventive step when the document is taken which is not cannot be considered involve an inventive step when the document is combined with one or more other such of ments, such combination being obvious to a person s in the art.  The document member of the same patent family.  The document member of the same patent family.  The document member of the same patent family.  The document member of the international search report.				4,6-8, 13,18,19
